PRIME BC PREPARES FOR THE 2010 WINTER GAMES

The opening ceremonies for the 2010 Winter Games are weeks away and the ISU (Integrated Security Unit) has been preparing to ensure a safe and secure event. Versaterm is pleased to be able to participate in this effort and along with Prime Technical Services and RCMP E-Division IT staff have the various applications and interfaces 'ready to roll'. This preparation included installing CAD 7 in the ISU Communication Centre with interfaces to various system components as well as CPIC.

A recent initiative is the implementation of the Versadex Handheld MDT (HMDT) and deployment of this to the Vancouver Police Department. This will enable VPD officers to have ready access to RMS, CPIC and PIP data as well as mugshots from their Blackberry devices.

Another successful project that will benefit users during the games and beyond is support for a new PTT (Push-to-Talk) interface that has been recently introduced in the province. WICLink (Windows Intertalk Console) is the interface that enables the new digital radio system (being rolled out by the RCMP in BC) to communicate with the Versadex PoliceCAD and support Emergency Alarms, PTT and RTT (Request to Talk) functionality. This is in addition to the functionality currently supported by the CADLink interface of the EDACS radio system.

So, along with the transition to CAD 7 and the move to support Wireless Phase II, this has been a very busy few months for all involved!
