

## Announcement

March, 2009

# SACRAMENTO SHERIFF'S DEPARTMENT SELECTS VERSATERM

The Sacramento Sheriff's Department (SSD) has selected Versaterm to supply an integrated CAD/Mobile computer system.

The SSD is replacing their home-grown CAD with a system that provides a broad spectrum of functionality incorporating Automatic Vehicle Location (AVL) technology, the Versadex Crime Analysis Package (VCAP), as well as interfaces to a variety of external systems supporting CLETS, County CJIS, and RMS query capability.

The Sacramento Sheriff's Department serves a growing region of approximately 1.4 million people and covers 965 miles of territory within the Central Valley, which is California's prime agricultural area.

SSD will be able to take advantage of Versaterm's extensive experience in the State of California and will join the ranks of Sacramento (City), Fullerton, Anaheim, Bakersfield, Santa Barbara, Simi Valley, and Walnut Creek Police Departments.

We anticipate this to be a model project for the Sacramento Sheriff's Department and we look forward to working together to implement a successful enterprise class system.

*The best public safety software...  
but don't just listen to us, listen to our clients - we do!*
