CITY OF PHOENIX SELECTS VERSATERM

We are pleased to announce that the City of Phoenix has selected Versaterm to implement a new CAD and Mobile Data Computer System for the City of Phoenix Police Department.

Phoenix was looking for a comprehensive, single source solution to meet the demands of their growing region.

The Phoenix Police Department handles more than 2.5 million calls for service each year. There are currently 3,114 active police officers and 1,164 civilian employees.

Phoenix has a population of 1.5 million, ranking the City as the fifth largest in the United States. Phoenix joins several other major US cities that are already members of the Versaterm user community: Denver, Seattle, Austin, Salt Lake (City and County), and Sacramento (City and County).

Phoenix becomes Versaterm's first customer in the State of Arizona and with our US office in Scottsdale, we are thrilled to offer service to a neighbouring community.

*The best public safety software...
but don't just listen to us, listen to our clients - we do!*
