

## Announcement

May, 2010

## VERSATERM HOSTING SITE LIVE

The Calgary Police Service is now live with the Versaterm hosted CopLogic Citizen Online Reporting System.

Versaterm has set up two fully redundant, clustered servers that house the CopLogic software and Calgary has become the first non-Versaterm customer to use our hosted CopLogic services.

Versaterm can now host the internet based reporting system for any Canadian site (whether a Versadex customer or not).

The multilingual CopLogic 'Desk Officer Reporting System' (DORS) allows citizens to file police reports and report other incidents, over the Internet, with their police agency. Some agencies are taking in an excess of 25% of all their reports online without having to dispatch an officer and yet are still collecting all the report information for crime analysis, investigations, as well as state and federal reporting, while simultaneously providing a service enhancement and appreciated convenience to the public they serve.

*The best public safety software...  
but don't just listen to us, listen to our clients - we do!*
