

Announcement

June 2011

San Jose Police Department selects Versaterm

We are very pleased to announce that after a methodical and exhaustive evaluation process which included a Request for Information, A Request for Proposal, and a Best and Final Offer, the City of San Jose has awarded the contract for the Police Department's new Automated Field Reporting and Records Management System to Versaterm. An agreement with the City of San Jose will be signed in early April.

With a population of just over 1 million, San Jose is the tenth largest City in the United States and the third largest in California. It is located in the heart of Silicon Valley about 30 miles south of San Francisco. The San Jose Police Department serves an area of approximately 180 square miles with 1,300 sworn and 432 non-sworn personnel.

The new system will enable the department to process and manage the 100,000+ reports generated each year without paper and clipboard. In order to do this, San Jose recognized that success required finding and working with a single vendor capable of providing an integrated solution – a system that would integrate Records Management, Field Report Writing and Case Management into a single Enterprise-wide system. Additionally, this system also needed to provide seamless integration with the 3rd party CAD system currently in use.

We are very happy to now include San Jose in to the growing family of Versaterm agencies.
