PIP Upgrades to v3.3

We are pleased to announce that the RCMP PIP (Police Information Portal) has now upgraded from version 3.1 to version 3.3. This new version implements the CPSIN-based web services interface that will enable wider connectivity for other RMS vendors (Waterloo Regional Police has begun to implement to the interface). This is a major roll-out involving new operating system and hardware infrastructure at the RCMP end.

Management of PIP is handled by the RCMP's N-III project team on behalf of the CACP & Canadian police user community. As the application developer and initial system implementer, Versaterm continues to be closely involved in this project.

PIP (Police Information Portal) is Canada's national information sharing system and is powered by Versaterm's LEIP (Law Enforcement Information Portal). PIP facilitates the sharing of information (through RMS connection) across the broad spectrum of public safety services (over 60,000 officers) - RCMP, provincial and municipal police services and other public safety partners across Canada.
