

>>> Product Highlights

- Provides functionality to query the RMS, LEIP/PIP, and national databases (e.g., CPIC, NCIC).
- Provides officers quick and easy access to mugshots, related events, and alias information.
- Provides the ability to be dispatched from CAD.
- Provides officers with the ability to update their current status, and query the status of other units.
- Provides officers with the ability to add remarks to calls.
- Able to send and receive messages from other handheld devices and MDTs.

Handheld Mobile Data Terminal (H/MDT)

Most public safety agencies today have a wireless mobile data terminal that enables officers in Patrol vehicles to use notebook PCs to query various databases (e.g., RMS, LEIP/PIP, NCIC, CPIC, etc.), send and receive messages, enter their reports in the field, and electronically submit those reports to the RMS.

What is often missing is the ability for non-Patrol units to be able to access this same data using a secure and reliable handheld device. Versaterm has developed an application called the Handheld Mobile Data Terminal (H/MDT) to meet this requirement and has deployed it on the BlackBerry™. With this application, Bike, Traffic, and Investigative officers will enjoy the same robust access to information they are used to from the laptop or desktop using an industry-proven handheld platform. What our users tell us is that being transferred out of Patrol no longer means you have to give up all that useful investigative data.

From the H/MDT officers can:

- perform person and vehicle information queries from LEIP/PIP, CPIC/NCIC, and the RMS
- perform business information queries from the RMS
- request mugshots from LEIP/PIP and the RMS
- request alias information for persons and businesses
- request all offense reports, tickets, street checks
- be dispatched to, or request calls
- have the ability to change their status
- query the status of other units
- have the ability to add remarks to calls.
- communicate by messages with other H/MDT users and MDT users.

HMDT main screen

Simple to use and requiring little user training thanks to a clear and intuitive interface design, the H/MDT application enables all officers to truly be part of the police network. Whether on foot patrol, bike patrol, or in a boat, the ability to provide officers with quick and easy access to critical police information from anywhere is sure to be appreciated by the Versaterm user community.

*The best public safety software...
but don't just listen to us, listen to our clients - we do!*
