

Imaging

Versaterm offers two optional image storage and retrieval facilities. Imaging is the process of scanning a photo or document in order to store, retrieve and reproduce it. The resulting image, when magnified, is almost as good visually as the original. This technology serves a number of useful purposes for Versadex users.

First, Versadex imaging offers users interfaces to a number of widely used mugshot systems that enable you to view photos from RMS desktops and even from mobile workstations. In addition, Versaterm offers an optional mugshot system designed to let you see a subject's photo as you review the record.

Second, Versadex imaging offers an image capture and attachment option to support storing and displaying (or playing) images, PDFs, and other file types, such as video and audio files.

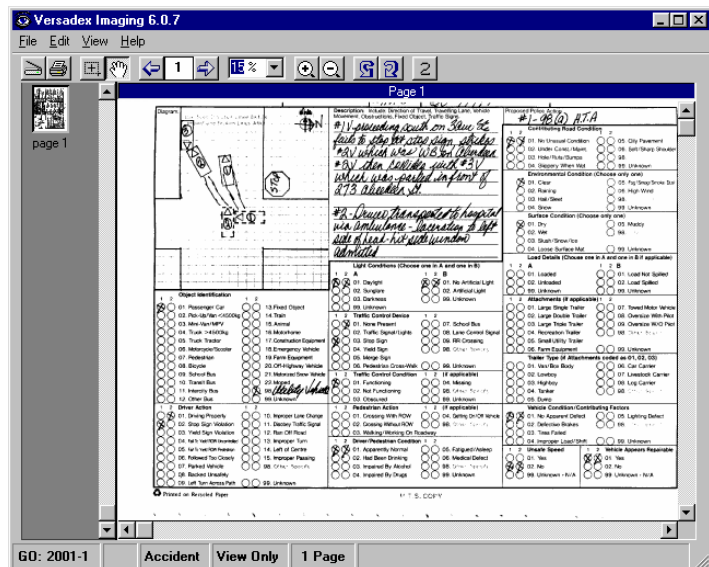

Documents that are not appropriate for data entry, such as signatures, official documents, fraudulent checks, drawings, or large documents that are not worth re-keying, can be scanned and saved as PDFs. Images, PDFs, video, and audio files can be attached to various components of an offense report.

Versadex document imaging can also store and present photo images, such as missing children, crime vehicles, and sex offender parolees.

Ultimately, the possibilities for and uses of Versadex Imaging are endless. A scanned image screen is shown below.

>>>Features

- *Inexpensive for hardware, software, operating costs.*
- *Open, supports most scanners, suppliers, etc.*
- *Easy to use, typically by many users.*
- *Can import and attach existing digital images, PDFs, audio files, video files, etc.*
- *Images displayed in Adobe Reader.*
- *Color and black and white images appear embedded within event hardcopies.*

Mugshots

Versaterm interfaces to many mugshot systems. Regardless, the process used is similar to what is shown in the following diagram.

Criminal Description record with mugshot

Result of a mugshot query

Mugshot systems and collections can be used for capture, line-ups, etc. The RMS can supply the most recent subject photo to officers at their desktops or more importantly, to their mobiles in vehicles with notebook computers.
