JusticeTrax®

Purpose-Built Forensic
Lab Management

versaterm

Designed For Your Laboratory By Our Forensic Scientists

There is growing demand for forensic services due to the complexity of modern investigations and the need to manage a large amount and variety of evidence and related data.

Crime labs and forensic units use modern technology for case management that provides a clear view of operations.

Explore how our solutions improve efficiency, reduce costs, and track chain of custody while maintaining quality.

JusticeTrax

Providing a comprehensive view of laboratory cases with robust integrations and reporting

JusticeTrax by Versaterm integrates evidence tracking, analytical results, forensic laboratory management, property room management and reporting for a comprehensive view of the overall case.

Over 190 forensic laboratory sites and property and evidence units globally use our solutions daily to produce and deliver accurate analyses and information quickly.

Built specifically for the law enforcement and forensic communities, we constantly improve our solutions with input from the thousands of forensic scientists and analysts using our applications.

Exceptionally Adaptable

Versaterm's JusticeTrax solutions are designed by forensic scientists for forensic scientists. That's why we know that it's important for our solutions to be adaptable to fit your lab's unique needs rather than force your processes to fit our solutions.

Multi-Disciplinary
Configurable to address the needs of all testing disciplines within the forensic laboratory

Configurable
Create custom interfaces using the custom forms designer

Customizable
Customize reports and other templates to fit laboratory processes and requirements

Quality-Driven Approach

Your lab works diligently to manage quality and meet the standards and requirements for accreditation. We prioritized making quality management efficient when designing our solutions.

Unified Components
Integrate evidence tracking, analytical results, and laboratory management information

Efficient Quality
Streamline quality management through uniformity of information

Internationally Certified
ISO 9001:2015 and ISO/IEC 27001:2013 registered company

JusticeTrax Cloud

A complete cloud-based Software as a Service (SaaS) subscription available for all JusticeTrax solutions.
Continuous Protection
Microsoft Azure tools provide backup data and disaster recovery, prevent unauthorized access, and are continuously updated and maintained

Real-Time Monitoring
Automated tools provide highly available applications with tools to handle traffic volume and scalability

Continuous Deployment
New application releases are managed for the customer and includes infrastructure updates and patches

LIMS-plus & Portal

A comprehensive case management tool that integrates evidence tracking, analytical results, and lab management information.

Increase Accuracy & Security

Barcoding of evidence, strengthening chain of custody, and ensuring that reliable inventories are standard practice

Streamline Quality Management

Uniformity of information involving test methods, training records, instrument validation, maintenance and performance verification, and subpoenas
Enhanced Professional Communications

Tailored and specific report templates that are defined by each laboratory based on the testing discipline

LIMS-plus DNA

Designed to help reduce DNA backlogs by automating forensic sample data processing for both casework and databanks.
Add & Arrange Samples in Batches

Add samples to batches and arrange them on plates quickly and easily, and monitor each phase of the DNA process

Maintain Instrument Maintenance History

Solution records and stores a historical log of your instrument maintenance and calibration information

Integrate with Lab Instrumentation

Ability to upload sample and batch information to instruments as well as to download sample results from instruments

CIMS

The Consumables Inventory Management System (CIMS) allows you to efficiently manage your stocks of raw chemicals, prepared reagents, and other lab consumables.

Customize Material Templates

Create templates for Raw Materials and Reagents that contain information such as QC Procedures, NFPA information, Ingredients, and Re-Order info

Easily Request Raw Materials & Reagents

Create Orders to purchase Raw Materials from a Vendor or request that a Staff Member create a Reagent

See Reorder & Expiration Information

See notifications for Materials that are running low, are due to be reordered, or are expiring - all from the Dashboard

ChainLinx

A Property and Evidence Management solution, integrating evidence item barcoding, tracking, and statistical and administrative reporting.

Increase Accuracy & Security with Barcoding

Barcode property and evidence to solidify the chain of custody through both single-party and multi-party transfers secured by staff barcode/PIN entry

Create Custom Interfaces

Using custom forms, ChainLinx administrators can customize the system to suit their needs

Protect & Securely Store All Data

ChainLinx's browser-based, modern architecture requires no locally installed software and is designed to integrate with other systems

About Versaterm

Versaterm is a global public safety solutions company helping agencies transform their organizations by providing innovative solutions, expertise, and an unwavering dedication to customer service. Formed in 1977, we are on a journey to build an ecosystem that will enhance community safety by creating purposeful integrations across the public safety spectrum. We deliver intuitive tools developed for public safety agencies, forensic labs, court systems, schools, and other institutions. Our selective growth strategy focuses on improving customer and user workflows for more efficient and effective operations, leading to better service and more just outcomes. For more information, visit versaterm.com, LinkedIn, or X.

Versaterm acquired JusticeTrax, a provider of software for forensic science and law enforcement professionals since 1995. The products allow for efficient, effective and quality management of analytical and administrative data that staff can rely on for sound decision making.
