

Versaterm RMS

Unlock Greater Transparency
and Actionable Insights

 versaterm

Turn Your Data Into Actionable Insights

Modern public safety requires a records management system that can empower your proactive and preventative work through intuitive data capture, integrated validation, extensive capacity, and comprehensive data analysis.

These systems are incorporating data from other department systems and sources. Designed for direct entry, natural use features reduce the risk of data entry errors and simplify training.

Reliable records data is the backbone of effective public safety operations. It ensures that agencies can fulfill their missions, maintain transparency, and better serve their communities.

Versaterm JMS

Versaterm RMS

Meet the demand for greater transparency, actionable insights, and community-focused policing

Discover an intuitive platform equipped with robust auditing and logging capabilities, tailored for smarter decision-making. Our records management solution offers quick access to mission-critical data, enabling trend identification, refined searches, and customizable data analysis. This system provides seamless data entry, potent searches, and role-based functionality, empowering every user to streamline workflows.

Seamless integration with Versaterm's Computer-Aided Dispatch (CAD) system ensures a powerful, user-friendly tool for data-driven decisions. Versaterm RMS dashboards make essential information readily accessible from the moment a shift begins, enhancing public safety personnel's efficiency and effectiveness. You can also extend your Versaterm RMS capabilities to the field and jails.

Future Ready

Empowering agencies with an easy and efficient way to integrate and manage their data now and in the future

Improve Information Flow

Fully integrates with Versaterm
CAD and other dispatch systems
for seamless data sharing

Bi-Directional Integrations

Stay connected with NCIC/CPIC,
NLETS, and state networks for
more in-depth intelligence

Deploy Across Multiple Jurisdictions

The system supports multiple
jurisdictional installations with
NIBRS and UCR2 compliance

Records Management

Agencies can swiftly enter, search and retrieve critical data, discern patterns, and visualize information for preventative and proactive policing

Improve Efficiency

Reduce the risk of data entry errors with smart automations, natural use features, and reuse of data

Access Anywhere

Intuitive interface mimics the desktop on mobile devices to speed up data entry and leverage capabilities, such as the camera, barcode scanner, etc.*

Enhance Intelligence

Simplify statutory reporting, including NIBRS and UCR2 compliance, to help identify trends and patterns that can inform decision-making and improve effectiveness

*available in Canada only

Add-On Modules

Help meet the evolving needs of your agency and public safety partners

Versaterm MRE

The Mobile Record Entry option provides a simplified, easy-to-navigate user interface that allows officers to quickly enter, modify, and complete reports in the field with offline capabilities

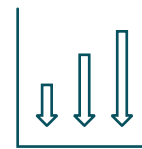

Capture Information Once

Take advantage of numerous prefill screens and the ability to transfer reports directly to the Versaterm RMS using the same user interface

Access Critical Data

Information checks on names, addresses, vehicles, property, etc. against local Versaterm RMS and County, State, and national databases

Reduce Errors

The migration from notepads to mobile entry for taking statements, entering data, and sharing information creates a more accurate record

Versaterm JMS

Integrations with the Versaterm RMS Master Name Index and Criminal Description record with integrated NCIC help simplify the arrest and booking process*

Useful Integrations

Whenever an individual is arrested, a Criminal Description (CD) record is created where information specific to the offender can be recorded (CD and FBI numbers, fingerprint classification information, etc.)

Simplify Intake Workflows

During an arrest, the record is linked to a Booking record, and one or more charges, warrants, court appearances, and dispositions while an Intake Status Screen provides a visual overview of each inmate's status during the admission process

Support Safety

Inmate assessment and classification along with keep separate notes, mugshots, and cautions that display throughout the system support staff and other inmate safety

*full JMS available in U.S. only; cell management available in Canada

About Versaterm

Versaterm is a global public safety solutions company helping agencies transform their organizations by providing innovative solutions, expertise, and an unwavering dedication to customer service. Formed in 1977, we are on a journey to build an ecosystem that will enhance community safety by creating purposeful integrations across the public safety spectrum. We deliver intuitive tools developed for public safety agencies, forensic labs, court systems, schools, and other institutions. Our selective growth strategy focuses on improving customer and user workflows for more efficient and effective operations, leading to better service and more just outcomes.
