

Versaterm Forensics

Purpose-Built Forensic
Lab Management

 versaterm

Designed For Your Laboratory By Our Forensic Scientists

There is growing demand for forensic services due to the complexity of modern investigations. This increased volume means the management of a large amount and variety of evidence and related data. Your crime lab or forensic unit can use modern technology for case management that provides a clear view of your operations.

Versaterm acquired JusticeTrax, a provider of software for forensic science and law enforcement professionals since 1995, in 2021.

Explore how our Versaterm Forensics solutions improve efficiency, reduce costs and track chain of custody while maintaining quality.

Versaterm Forensics

Providing a comprehensive view of laboratory cases with robust integrations and reporting

Versaterm Forensics integrates evidence tracking, analytical results, forensic laboratory management, property room management and reporting for a comprehensive view of the overall case. We have options for DNA and consumables inventory management. Our solution can be implemented on-premises or through a secure cloud-based instance.

Over 190 forensic laboratory sites and property and evidence units globally use our solutions daily to produce and deliver accurate analyses and information quickly.

Built specifically for the law enforcement and forensic communities, we constantly improve our solutions with input from the thousands of forensic scientists and analysts using our applications.

Versaterm Forensics Overview

Versaterm Forensics, formerly JusticeTrax, solutions are designed by forensic scientists for forensic scientists. That's why we know that it's important for our solutions to be adaptable to fit your lab's unique needs rather than force your processes to fit our solutions.

Multi-Disciplinary

Configurable to address the needs of all testing disciplines within the forensic laboratory

Configurable

Create custom interfaces using the custom forms designer

Customizable

Customize reports and other templates to fit laboratory processes and requirements

Versaterm Forensics Overview

Quality-Driven Approach

Your lab works diligently to manage quality and meet the standards and requirements for accreditation. We prioritized making quality management efficient when designing our solutions.

Unified Components

Integrate evidence tracking, analytical results and laboratory management information

Efficient Quality

Streamline quality management through uniformity of information

Internationally Certified

ISO 9001:2015 and ISO/IEC 27001:2022 registered company

Versaterm LIMS-plus

A comprehensive case management tool that integrates evidence tracking, analytical results, and lab management information.

Increase Accuracy & Security

Barcoding of evidence, strengthening chain of custody, and ensuring that reliable inventories are standard practice

Streamline Quality Management

Uniformity of information involving test methods, training records, instrument validation, maintenance and performance verification, and subpoenas

Enhanced Professional Communications

Tailored and specific report templates that are defined by each laboratory based on the testing discipline

Versaterm LIMS-plus Portal

This Versaterm LIMS-plus function enables law enforcement professionals to enter and submit evidence information to the laboratory through a secure internet connection. The portal also allows for the retrieval of final laboratory documentation and reports. It can be accessed anywhere, anytime - from the crime scene, a vehicle or at the station.

Reduce Evidence Entry Time

Designed to decrease new evidence processing time and duplication efforts so staff can focus on analysis

Share Case Information with Partners

Law Enforcement Agencies and Attorneys can check the status of a case as it progresses through the lab

Remove Reporting Inefficiencies

Agency representatives receive a link to the final report for them to view, save or print after the case is completed or released

Versaterm DNA

Versaterm DNA, formerly Versaterm LIMS-plus DNA, is designed to help reduce DNA backlogs by automating forensic sample data processing for both casework and databanks.

Add & Arrange Samples in Batches

Add samples to batches and arrange them on plates quickly and easily, and monitor each phase of the DNA process

Maintain Instrument Maintenance History

Solution records and stores a historical log of your instrument maintenance and calibration information

Integrate with Lab Instrumentation

Ability to upload sample and batch information to instruments as well as to download sample results from instruments

Consumables Inventory Management

Versaterm Consumables is the former JusticeTrax Consumables Inventory Management System (CIMS). This product can be added with your Versaterm LIMS-plus subscription. It allows for the efficient management of your stocks of all laboratory consumables, including raw chemicals and prepared reagents.

Customize Material Templates

Create templates for Raw Materials and Prepared Reagents that can satisfy QC procedure requirements, Material Safety Data, reagent preparation and manage supplies of stocks

Easily Request Raw Materials & Reagents

Create Orders to purchase Raw Materials from a Vendor or request that a Staff Member or Group create Prepared Reagents

See Reorder & Expiration Information

Dashboard view of Material stocks running low, needing re-order or are nearing expiration can help staff ensure adequate supplies are always available

Versaterm Property & Evidence *(formerly ChainLinx)*

This crime lab and forensic unit solution integrates evidence item barcoding, tracking and statistical and administrative reporting.

Increase Accuracy & Security with Barcoding

Barcode property and evidence to solidify the chain of custody through both single-party and multi-party transfers secured by staff barcode/PIN entry

Create Custom Interfaces

Using custom forms, Versaterm Property & Evidence administrators can customize the system to suit their needs

Protect & Securely Store All Data

The browser-based, modern architecture requires no locally installed software and is designed to integrate with other systems

Versaterm Forensics Included Services

We offer two installation formats to fit each agency's needs. There is the traditional on-premises implementation. We also have a complete cloud-based Software as a Service (SaaS) subscription.

Both formats are the same. However, there are additional benefits from using the SaaS option which are outlined below.

Continuous Protection

Microsoft Azure tools provide backup data and disaster recovery, prevent unauthorized access, and are continuously updated and maintained

Real-Time Monitoring

Automated tools provide highly available applications with tools to handle traffic volume and scalability

Continuous Deployment

New application releases are managed for the customer and includes infrastructure updates and patches
