Smarter Intel Leading to Safer Communities

Public safety agencies often operate with disconnected, siloed systems that hinder seamless intelligence sharing across teams, departments or jurisdictions. This can lead to slow or delayed investigations, decreased situational awareness and a reduction in community trust.

The role of criminal intelligence in public safety has changed significantly in recent years. Compartmentalized criminal intelligence units have been joined by fusion centers and regional sharing initiatives. Information availability and multi-jurisdictional sharing has come to the fore, with the expectation that intelligence will be received, evaluated and acted upon rapidly. With the overwhelming volumes of data, agencies need to manage intelligence in accordance with prevailing guidelines and requirements to continue to deliver fast and just outcomes to their communities.

Versaterm OpsIntel for Criminal Intelligence

Purpose Built Criminal Intelligence Software

Supporting today's criminal intelligence requirements, the Versaterm OpsIntel for Criminal Intelligence software program is a cloud-based, intelligence submission solution that provides investigative and analytical support, while helping to meet government guidelines and requirements. Support for operations policies outlined in the United States Department of Justice DOJ CFR 28 Part 23 is essential.

With intelligence submission being the focal point of the solution, Versaterm OpsIntel for Criminal Intelligence empowers agencies with a secure, comprehensive platform. The solution helps agencies uphold the standards of receiving, reviewing and acting upon intelligence rapidly to continue to serve and protect the community.

Intel Submission Module

Included Modules:

Intel Submission Module
Documents the suspicion of people (subjects), groups and businesses

Vehicle List
Document vehicles reasonably suspected to be involved in criminal activity

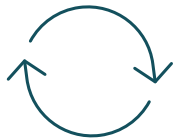

People List
View and administer intelligence subjects

Discussion Board Module
Enhance information sharing through a variety of Activity Reports

Item Level Permissions and Access Control

Support criminal intelligence investigators and analysts in managing critical data while ensuring compliance with 28 CFR Part 23 and CJIS Standards.

Criminal Intelligence Life-Cycle

Manage intelligence life-cycle fundamentals including source reliability, assessment, assignment, corroboration, review and purge

Retention Scheduling and Purging

Customized retention schedules and expiration review for items to be purged and ensure that all information is validated

Usage and Audit Trails

Authorized personnel can track and document what information was accessed, printed or shared

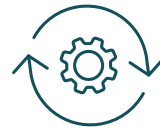

Tasks and Reporting

Allow users to be notified of actions needed on submissions.

Generate reports including dissemination and retention or purge logs.

Meet Submission Criteria
Submission may or may not be confirmed and retention and evaluation criteria are stored with each submission

Scheduled, Periodic Reviews
Record retention, assessment and follow-up management to ensure data is validated

Internal Compliance Audits
Robust background audit logging of system access, change and purge activity

Intelligence Information Search
Ability to search through PDFs or other document text for important information

Holding Bin Area

Allocated agency personnel easily review and approve new submissions before they are visible in the system.

Data Management
Centralized intelligence platform with streamlined review and robust audit trail

Data Collection
Ensure each submission is appropriate for inclusion, they must meet "reasonable suspicion" requirements

Effective Information Sharing
Mandatory entry field and comprehensive features to support the review and purge process

Access Control and Audit Logs

Ensure secure access and comprehensive activity tracking within the system.

Authorized Users
Accessible only to authorized agencies or individuals governed by a “Need to Know” and “Right to Know” basis

Secure Sign-On
Multi-factor authentication with complete logging of dissemination events and access logs

Security is Key
Track all actions taken regarding an intel submission along with reason for action

Retention Periods and Approval for Purge

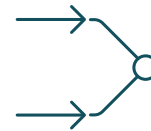

Purge and review dates of entries are updated via an automatic background process to reflect the retention criteria.

Scheduled, Periodic Reviews
Review, validate and approve items for purge to improve data management

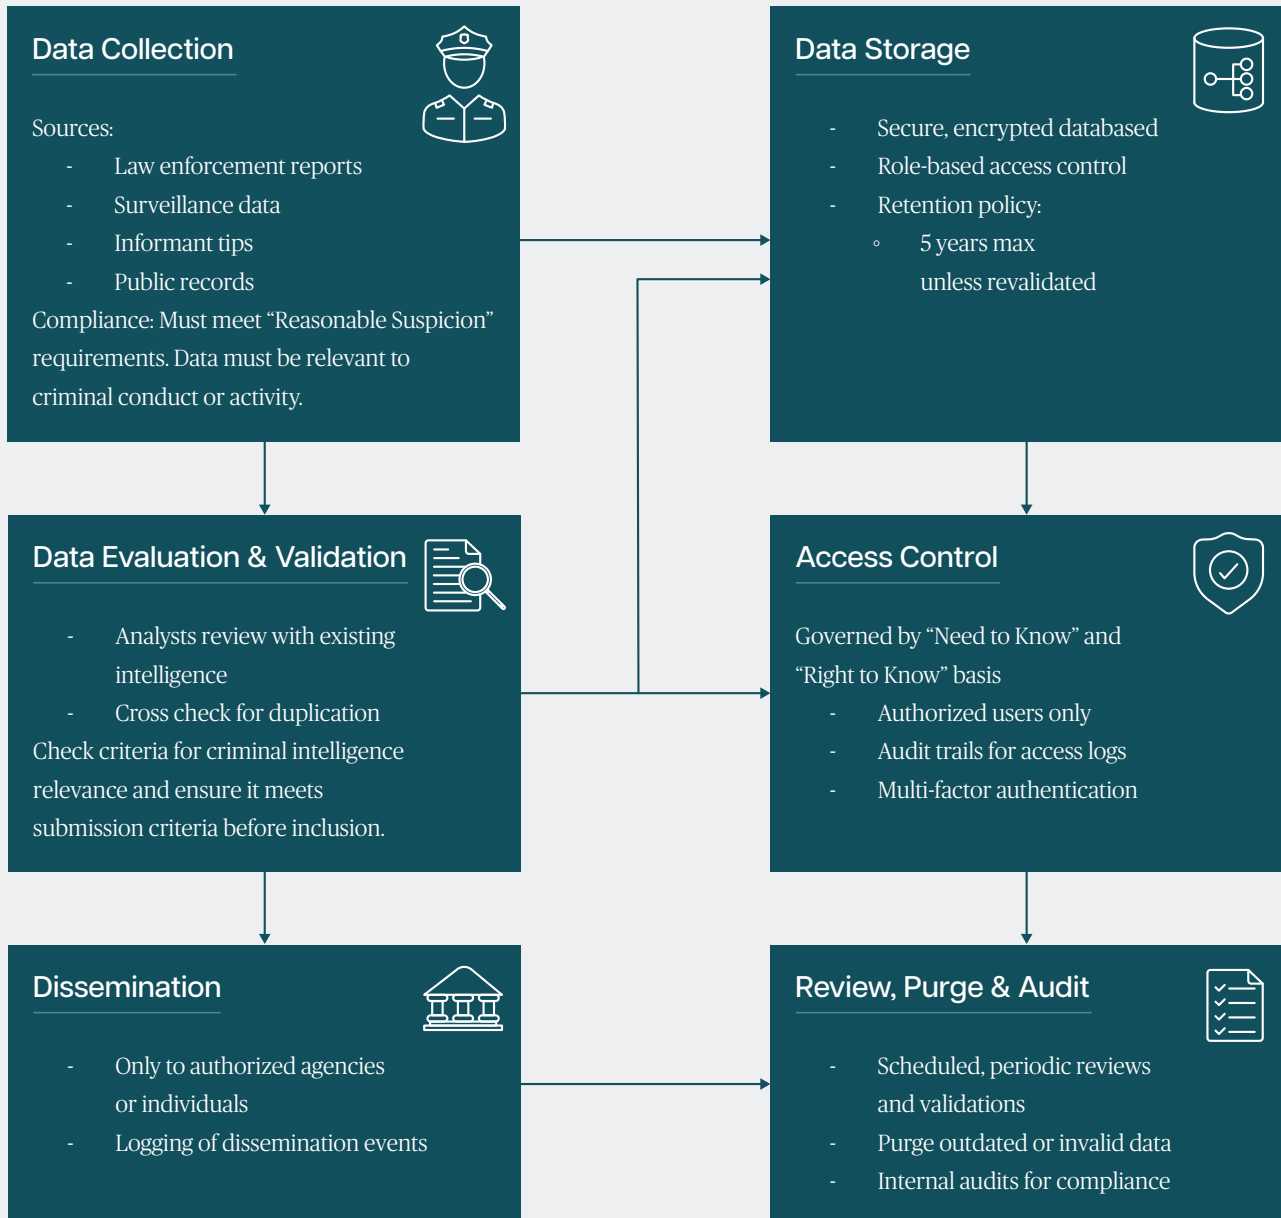

Retention Policy
Purge dates are assigned when new submissions are entered

Connect the Dots
Linked items will inherit the updated purge date when the primary item is extended

Solution Workflow

About Versaterm

Versaterm is a global public safety solutions company helping agencies transform their organizations by providing innovative solutions, expertise and an unwavering dedication to customer service. Formed in 1977, we are on a journey to build an ecosystem that will enhance community safety by creating purposeful integrations across the public safety spectrum. We deliver intuitive tools developed for public safety agencies, forensic labs, court systems, schools and other institutions. Our selective growth strategy focuses on improving customer and user workflows for more efficient and effective operations, leading to better service and more just outcomes.
